

APPLICABLE MOTOR MATCHING TABLE

PRODUCT SERIES	CM82
Product Name	CN82TN
Rated Torque	1.2N.m
Opening and Closing Speed	14r/cm
Rated Power	110-240W
Function Brief	<ol style="list-style-type: none">1.DC motor built-in receiver2.2-core wire (zero wire, live wire)3.Pull start4.Power outage5.433 RF remote control6.Dry contact weak current control

FEATURES

Flexible, Ultra-quiet design

Ultra-quiet design, three silent patented technologies are used inside the motor, and the noise can be as low as 40 decibels during operation; leading intelligent design, soft start/soft stop functions like advanced elevators, make the opening and closing curtains lighter and quieter.

Pull Start Function

When the power is on, gently pull the curtain to offset 10cm in one direction by hand, and the curtain will automatically open or close.

Pull Start Function

The mechanical clutch structure realizes the function of pulling power when the power is cut off. When the power is off, it can be opened and closed like a normal manual curtain by pulling it by hand.

Multiple control Method

The opening and closing stroke points are automatically set, and the best stop position can be easily reserved and memorized to protect the components from noise or damage due to collision, and prolong the service life of the system. After the power is off, the stroke has a memory function and an intelligent design.
